

IPTEGO announces partnership with INDES-IDS BV

Berlin – September 17, 2009: INDES-IDS BV has singled out IPTEGO as a new partner to expand its range of integrated VoIP Monitoring solutions with the PALLADION VoIP Edition. INDES-IDS BV will cover the Belgium, Luxemburg and the Netherlands territory.

INDES, based in Culemburg in the Netherlands and founded in 1996, offers products and complete services for the test, verification and monitoring of professional tele- and data communication systems and networks to customers ranging from Tier-1 operators to enterprise-level customers.

With IPTEGO and its monitoring and assurance software solution PALLADION, INDES has selected a professional partner with outstanding knowhow.

Gerard Fianen (CEO, INDES) about IPTEGO: „In our discussions with IPTEGO we got impressed by the very strong knowledge and experience of IPTEGO and its employees of VoIP networks and the relevant NGN and IMS related protocols. This gives us comfort in offering the IPTEGO products to our customers as leading solution combined with the highest level of technical backup and support.“

IPTEGO is a leading developer and provider of software and hardware appliances for the Voice over IP industry. IPTEGO's PALLADION software sets a new standard for Mediation Layer solutions for OSS (Operations Support System) and BSS (Business Support System) systems. PALLADION enables network operations personnel to detect and solve SIP-based network problems quickly and effectively, saving both time and money, and ensuring a high quality of experience. The PALLADION software has the unique ability to hack into specific points in the network in order to retrieve valuable information and collect and test raw data. PALLADION is deployed exclusively in the field of IMS networks or, more precisely, in the field of VoIP.

Alexander Hoffmann (CEO, IPTEGO): "We're excited to engage with another partner for our PALLADION VoIP Edition. We see more and more momentum for our product in the ITSP World, and believe that monitoring should be the companion of any VoIP/NGN architecture to lower operating costs and maximize QoE".

IPTEGO'S PRODUCT:
 **PALLADION**

PALLADION has three key business areas, Service Assurance to ensure continuous error-free network operations, revenue assurance to prevent revenue leakage and fraud, Quality Assurance to provide the quality of experience to customers expectation.

With the PALLADION solution IPTEGO is among other worldwide known companies one of the next generations innovation leaders of INDES.

Company Profile: IPTEGO

“Freedom to Innovate”

IPTEGO GmbH was founded in 2006 in Berlin (Germany) by SIP pioneers Alexander Hoffmann (CEO) and Ulrich Abend (CTO) after years of successful development work at the Fraunhofer Institute in Berlin (Open Communication, FOKUS).

The internationally operating software vendor develops customized programs and scripts in the fields of SIP and IMS. Its core competency is satisfying the particular demands of service providers in terms of reliability, optimisation and cost efficiency of their networks (SIP, IMS). And hence, the PALLADION program that performs proactively and offers quick quality assurance solutions for the latest generation of data transmission.

IPTEGO's target groups are international carriers, DSL providers, cable network services, ISPs and VoIP hardware manufacturers. Included among its existing clients are several Carriers such as global players.

Customer satisfaction, along with revenue, is increased through the avoidance of complicated errors. PALLADION makes it easier to solve complicated bugs by his error checking in real time. With PALLADION the provider's network is getting transparent.

Through experienced product developers and a quick decision-making processes, IPTEGO can offer now with PALLADION what other companies are still just developing.

Product Profile: PALLADION

The next generation of telephony obtains a new quality standard with PALLADION

VoIP telephony signifies the telephony of the future. IPTEGO redefines telephony. In PALLADION the company offers the highest quality in call creation and termination and already today is redefining voice quality. PALLADION's core functionality provides the highest technological standard in terms of real-time service assurance and monitoring of SIP and IMS networks.

PALLADION automatically detects errors, even before they are noticed by the end customer, and corrects them proactively. The Berlin company offers its target group customer satisfaction and precise cost control. In addition, PALLADION provides the advantage of data mining for the analysis of customer trends (business intelligence). The data transfer of tomorrow is becoming transparent.
